

Ashim Batajoo

Software Engineer | Full Stack (.NET | Angular)

Phone: 647-409-2041

Email: batajooashim12@gmail.com

Address: Greater Toronto Area, Canada

LinkedIn: <https://www.linkedin.com/in/ashim-batajoo-257815129>

CAREER OBJECTIVE:

With a diverse background in roles such as Project Manager, Team Lead, and Full Stack Developer, a wealth of experience has been gained in orchestrating successful projects, leading and mentoring teams, and delivering robust software solutions.

By seamlessly combining management expertise, technical skills, and a collaborative approach, consistent achievement of project objectives, efficient resource allocation, and the fostering of an environment of continuous improvement have been ensured.

I love cycling and photography during holidays. It's the perfect combination of exploration and creativity that brings me joy.

EXPERIENCE:

Software Engineer (Remote - Nepal)

Naya Software Inc
TampaFlorida, United States (May 2019 – April 2023)

Projects and Accomplishments:

- Word Web Integration:** Integrated WOPI Framework for Word Web, enhancing functionality and seamless integration in .NET Core API and Angular app.
- Dynamic Document Generator:** Implemented OpenXML library in .NET Core API.
- Word Add-In:** Developed Word Add-In using VSTO-AddIn, expanding document processing capabilities.
- Realtime Notification:** Integrated SignalR library for real-time notifications and effective communication within the app, improving user experience.
- OAuth:** Integrated MSAL for secure authentication and authorization in Angular and API projects.
- Library Integration:** Leveraged Aspose Words, Sync Fusion, and other libraries in API projects, enhancing application capabilities.
- Azure Resource Management:** Managed Azure Resources and Azure Active Directory, ensuring streamlined configuration and deployment.
- Project Management:** Successfully coordinated development and testing process in Nepal, collaborating with the US team.
- Training:** Provided strong leadership, training, and guidance to foster a high-performing work environment for the development and test team.

Software Engineer (On-Site)

IMark Digital Pvt. Ltd
Kathmandu, Nepal (November 2016 – February 2019)

Projects and Accomplishments:

- Module Integration:** Developed and integrated modules like Patient Registration, Billing, and Lab Reports into the Hospital Management system.
- Managing API Operations and Resources:** Efficiently managed the database repository in the API using Entity Framework, including API endpoint development and business logic implementation for patient billing and lab report generation.
- Requirement Gathering:** Collaborated with clients, gathered requirements, and devised optimal solutions aligned with project goals.
- Sprint Planning:** Organized and managed the development plan, ensuring efficient execution and timely delivery.
- Troubleshooting:** Successfully resolved issues and bugs in the client environment through effective troubleshooting.

EDUCATION

Software Engineering Technician (Post-Graduate)

Centennial College, Toronto (May 2023 – Current)

Bachelor in Computer Science and Engineering

Visvesvaraya Technology University, Bangalore, India (Sep 2012 – Aug 2016)

SKILLS

- .NET Core | ASP .NET MVC | Entity Framework
- Angular | RxJS
- API Integration: WOPI Framework for Word Web, OAuth 2.0, SignalR, OpenXML, Aspose, Sync Fusion Library
- Project Management | JIRA | GitHub | Azure Portal
